**Tema arhitektonske radionice za djecu je 'Krajobraz i gradnja'. Djeca će na radionici od stiropora složiti krajobraznu cjelinu iz našega kraja – uvalu Zonchi iz pulskog zaljeva. Kroz proces rada pokušat će se objasniti kako energija reljefa utječe na smještaj izgradnje i što intervencija u prostoru znači na razini fizičkih utjecaja – osunčanje, vjetrovi, nagibi terena- i na razini sklada u slici krajolika.**
